---

INCORPORATED 1904

MANUFACTURERS OF  
SHEET METAL  
PRODUCTS

CATALOGUE No. 100

Factories - Plainfield, W. Va.

---

Mail Address - Wheeling, W. Va.

## ANNOUNCEMENT

We have erected during the year 1910 a new manufacturing plant (fire-proof construction), giving us a very large floor space, which permits us to carry a large stock of raw material and manufactured goods.

Our machinery for manufacturing has been increased so as to double our capacity, and is the very latest and best equipment that can be purchased.

We are now in a position to make prompt shipments of all kinds of Sheet Metal goods. Let us serve you. Write for prices.

---

WHEELING METAL & MANUFACTURING CO.

Wheeling, W. Va.

We take pleasure in presenting our Catalogue No. 100, showing a complete line of Cornices, Skylights, Finials, Ventilators and Sheet Metal specialties.

In compiling this issue we have endeavored to be precise in illustrating and listing goods in which you are interested. You will find our line most complete and varied of any in the country.

We carry large stocks of all Sheet Metal products and are located so as to make quick shipments by any railroad entering the Wheeling district or by water.

Special attention given to architect plans.

Write for prices.

---

**WHEELING METAL & MANUFACTURING CO.**

### ORDERS ARE ACCEPTED ONLY ON THE FOLLOWING TERMS AND CONDITIONS

Thirty days prompt acceptance or two per cent. discount from net amount of invoice if paid within ten days from date of shipment. **No discount after ten days.**

Bills not paid at maturity are subject to sight draft with exchange and cost of collection, without notice.

Orders from patrons not favorably rated and not sending references will be shipped to our order, and sight draft with bill of lading attached will be sent through bank for collection.

Delays will be avoided if references are furnished with first inquiry or order.

Claims for damage or shortage must be made upon receipt of goods. All shipments should be checked upon arrival and claims reported immediately.

We are not responsible for damage to goods in transit unless contract stipulates delivery at destination and then only when shipment is receipted for as "damaged when received." Claims for damage must be accompanied by paid freight bill showing railroad agency notation as "damaged."

Damaged material should not be removed from station under a clear receipt, as this releases the Transportation Company from responsibility.

If shipped as ordered, goods must not be returned without our consent. If damaged in returning, credit will not be allowed to a greater amount than their value.

Returned goods should be accompanied by invoice and bill of lading.

All orders are entered subject to delays from strikes, accidents and other causes beyond our control.

Quotations are made subject to change without notice.

Unless on special quotation all orders are entered at market price at the time they are received.

## GALVANIZED CORNICES

---

### NOTICE

Each Cornice must be made up after measurements are received, which requires time, and it is important that orders be placed early so that they may be delivered by the time the goods are needed.

In ordring Cornice always give extreme length, including End Trusses. We will positively not be responsible for any errors made in measuring, nor will any change be made after work is started, except at the expense of parties ordering; orders are not subject to cancellation without our consent.

Trusses are all made with 12-inch face, unless otherwise ordered.

Cornices are all special and the importance of having correct measurements before the work is started is plain to everyone.

Designs can be modified to suit requirements.

We do not return plans sent us to work by until after material has been accepted and paid for.

All list prices are based on No. 26 gauge galvanized steel.

Price on Copper on application.

The Monarch Ventilator has many advantages over the old design Ventilators.

Write us for discount.

## VENTILATOR BASES

There are two plans of attaching the Monarch Ventilators, both of which are thoroughly practicable—a square tapered base, known as a “regulation base” made to fit a square or oblong opening in the roof; or a round pipe base with a suitable flange for shedding water. These bases are made of heavy galvanized sheet iron, and are made to fit any roof.

It will be observed from the cut that this type of base is constructed to give the highest efficiency. It is entirely waterproof and effective.

Great care should be exercised in taking measurements for these bases, as upon the accuracy of such measurements depend the satisfaction derived from their use.

## Gauge of Iron Used in Galvanized Bases for Monarch Ventilators.

## GALVANIZED STEEL TANKS

Prices do not include covers. When required they will be supplied at proportionate additional prices.

List prices of tanks on this page are based on No. 20 gauge. For tanks 8 and 10 feet in diameter, we advise using No. 18 gauge. This increases the price 25 per cent. No. 16 adds 50 per cent. to the prices herein given.

These tanks are provided with Angle Iron Stiffening Bands, and are well constructed, and make a good substantial and serviceable tank.

Tanks up to 6 feet in diameter and 5 feet high are shipped set up unless otherwise specified, and are well riveted together and soldered. Rectangular tanks not over 10 feet long are shipped set up, unless otherwise specified.

When shipped knocked down sides are all riveted together except the last seam, and the bottom is only in one or two pieces, so that the work of erection is reduced to the minimum.
